

**Version 3.19.04:**

What's New:

- Enhanced consumption load utility to handle more than one format. (*See below*)

## Multiple File Format:

1. No real change was made to the functionality of the automated load utility. The only difference is that now you will be able to choose two separate files and formats at the same time. Such as:

2. The first file selected is from a different source than the second, but the utility knows the difference and will handle the different formats as the load process occurs.
3. Both formats will display in the preview the same as the currently used format:

The screenshot shows a dialog box titled "Water Import Preview". It contains a table with the following columns: Row, Remove, New, File Name, Water Acct., From, To, Total, Prev., Curr., Co., Typ, Rec, and Account. The table lists 26 rows of data. To the right of the table are buttons for "Process", "Cancel", and "Reset Sort". Below the table is a "Record Match" legend with a yellow square for "Partial" and a red square for "Full".

Row	Remove	New	File Name	Water Acct.	From	To	Total	Prev.	Curr.	Co.	Typ	Rec	Account
6	<input type="checkbox"/>	<input type="checkbox"/>	RS112508	2349			49	4513	4562		1		McDonak
7	<input type="checkbox"/>	<input type="checkbox"/>	RS112508	2478			244	60139	60383		1		Gustine B

4. Processing will be done the same. New accounts will be marked as such.
5. The other thing to note is that every file will be named with the same format. So even though the fill listed above started with the word "BILLING", the utility will convert that filename into the utility's file name format.
